Projects

SpeakStack – Forum & Post Sharing Platform

🔗 Live: SpeakStack | Client GitHub

Description: SpeakStack is an online forum platform where users can create posts, search by tags, vote, comment, and report content. It includes a role-based dashboard for normal users and admins to manage posts and users efficiently.

Key Features:

- Post creation with tag-based search and popularity sorting
- Voting, commenting, and reporting system for community moderation
- Role-based dashboard for User/Admin functionalities
- Clean, responsive UI with DaisyUI + React
- Backend using Node.js & MongoDB

Tech Stack: React, DaisyUI, Node.js, MongoDB

Academix – Local Hobby Group Organizer

🔗 Live :Academix | Client GitHub

Description: Academix is a platform where users can create, join, and manage hobby groups based on shared interests. It helps people connect locally or online, join discussions, and organize activities/events around their hobbies.

Key Features:

- Firebase authentication (email & social login) with JWT-protected routes for secure access
- Group creation, joining system & member management
- Responsive UI with dark/light mode toggle for better user experience
- Modern design with React + Tailwind CSS
- Backend with Express & MongoDB for storing user, group, and activity data

Tech Stack: React, Tailwind CSS, Firebase, Express.js, MongoDB
